

# Silk Performer

Report generated at: Sunday, November 23, 2014 9:56:08 PM

## Detailed Test Report

Version: Silk Performer 15.5.0.6260  
 Project: CCProject  
 Start date/time: 11/20/2014 12:36:52 AM  
 Workload: Workload1  
 Workload model: Dynamic  
 Status:  No errors occurred

### Baseline test result overview

## Results for CCTryScript.bdf/VUser/Profile1

[back to overview](#)[summary tables](#)[transactions](#)[page and action timers](#)[web forms](#)

The transactions measurement group contains response time information about transactions. For each transaction defined in your load test script, a group of measurements is created; the name of the transaction is used as the key for the measurements.

Name	Avg	Min	Max	Count	StdDev
<b>#Overall Response Time#</b>					
Trans. ok[s]	130.829	41.746	385.432	197	60.197
Trans.(busy) ok[s]	8.471	2.807	15.287	197	3.819
<b>TInit</b>					
Trans. ok[s]	0.000	0.000	0.000	5	0.000
Trans.(busy) ok[s]	0.000	0.000	0.000	5	0.000
<b>TMain</b>					
Trans. ok[s]	130.829	41.746	385.432	197	60.197
Trans.(busy) ok[s]	8.471	2.807	15.287	197	3.819

## Results for CCTryScript.bdf/VUser/Profile1

[back to overview](#)[summary tables](#)[transactions](#)[page and action timers](#)[web forms](#)

The page and action timer measurements group contains measurements related to Web pages that are downloaded by a virtual user. For each Web page that is downloaded, a measurement group is created; the title of the Web page is used as the key to the measurement group created.

web forms

The Web form measurement group contains measurements related to Web forms declared in the load-testing script. The Web form measurement group provides response time measurements and throughput rates for form submissions with the POST, GET, and HEAD methods. For each form declared in the test script, a measurement group is created; the name of the form is used as the key to the measurement group created.
